# WINDOW PRODUCTS

## WINDOW AWNINGS

Window Awning Dome frame is made of high quality aluminum alloy LM6 extrusions. All extrusions are off white power coated. Pretreatment consists of base surface preparation followed by powder coating and subsequent baking at 250 degree. Fabric is mounted on the frame by being stapled on a black PVC bidding and then sealed with a PVC Hidem Tape. Available in projections from 2 feet to 5 feet & custom made length.

## DROP AWNINGS

The Nebula Drop is an awning with rotation angle of 140 degree from its fully open position to the fully closed position. Consists of spring loaded arms made of Lm6 alloy aluminum extrusions. All joints and brackets chromitized and then powder coated in white colour. Lever operated mechanism with gear box or a motorized model with the ease of operation at the flick of a switch.

## VERTICAL AWNINGS

Vertical Awnings are an extremely efficient form of protecting balconies & verandas from both Solar heat and rain. Covered balconies and verandas could be converted into comfortable zones when they can be protected from the harsh heat from the sun and also provide privacy when required. Nebula Vertical Awnings provide the user a completely open view or have the privacy desired to have a private siesta or celebration. Vertical awnings can be rolled up or down manually or with Motorised operation. Beautiful weather resistant fabrics in the colour & design of your choice to create a setting with the comfort of being indoors and at the same time enjoying the freshness of being outdoors.

APALA PRODUCTS
